

AR-TEMP FACE ID PAD

ACCESS CONTROL CAMERA

FACE RECOGNITION/TEMPERATURE INDICATOR

Monitor access to restricted areas using temperature readings and facial recognition thanks to access control camera.

Thanks to its backlight management with its WDR and in conjunction with the Instant Face Recognition algorithm (500ms), you can have an accurate face reading and avoid false alarms. Detection can be done even if using a face mask. Register up to 22,400 faces in the database. The camera will issue an audible alert if a person's temperature is too high.
